

URBAN AND REGIONAL PLANNING

1 URBAN PLANNING

It deals with the **city** or **settlement** concerning :

- The **material** infrastructures.
- The **immaterial** infrastructures.

The urban planning is organized in 3 different levels :

- **Urban Design**
- **Urban Planning**
- **Strategic Urban Planning**

1.1 URBAN PLANNING Urban Design

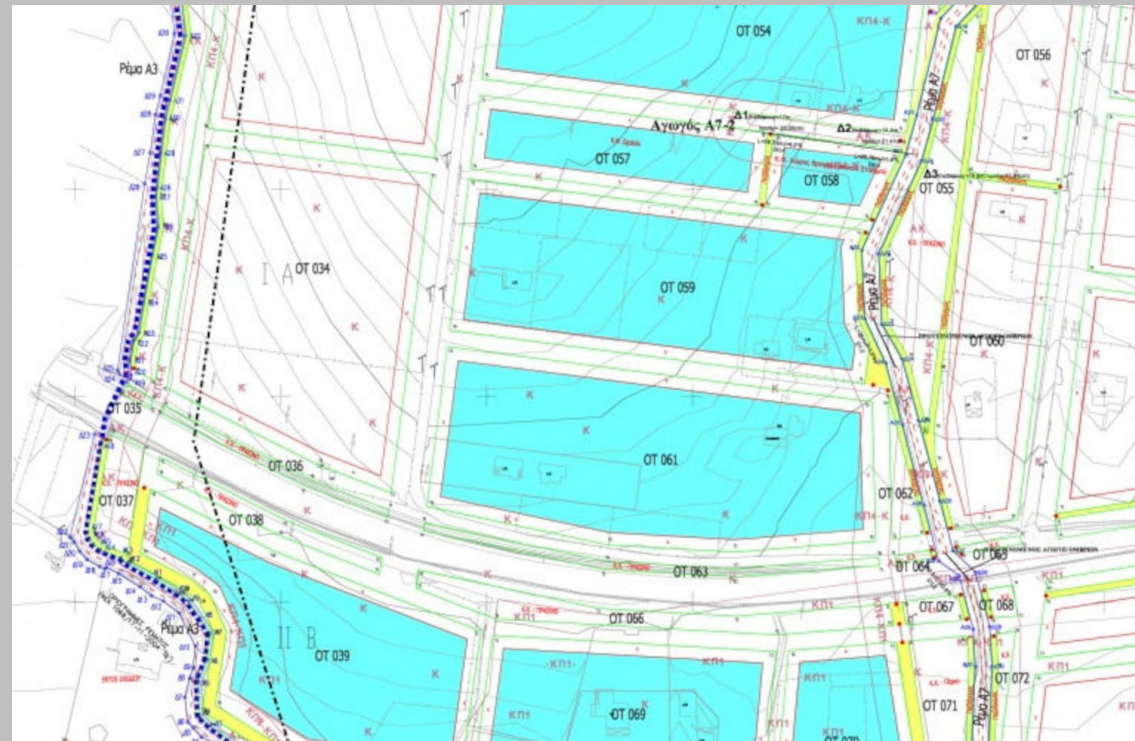

1 : 500

1.1 URBAN PLANNING

Urban planning implementation act

1 : 500

1.2 URBAN PLANNING

Urban Planning

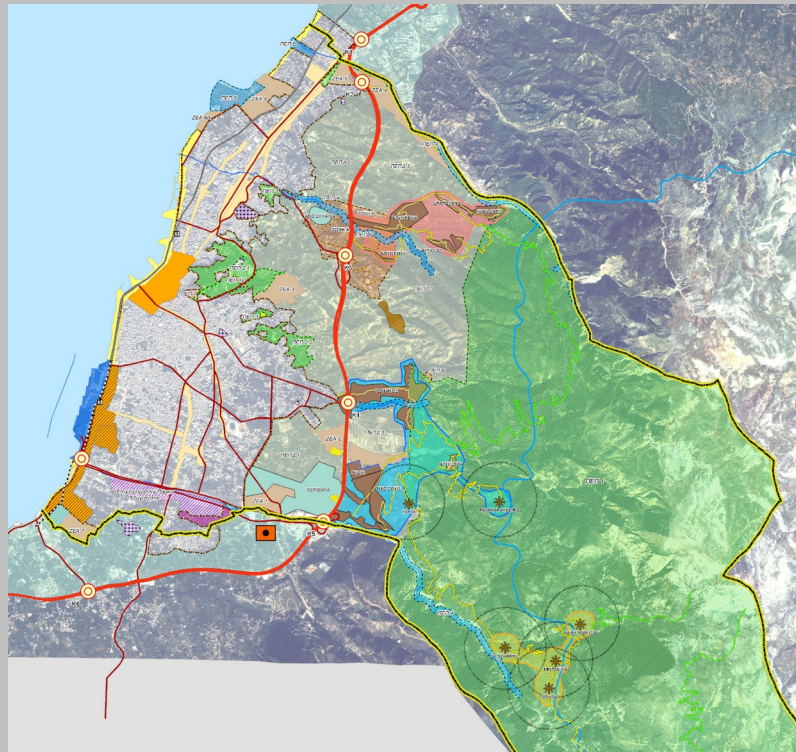

1 : 1000 - 5.000

1.3 URBAN PLANNING

Strategic Urban Planning

1 : 5.000 - 25.000

2. REGIONAL PLANNING Regional Planning deals with the **ex-urban** (rural) space :

- It examines the **settlements** and the **cities** as points (topological approach)
- It studies the **flows** and **relationships** that develop in the settlements and city networks.
- The dimension of the **natural environment** is dominant (peri-urban agriculture, coastal zone, river deltas etc.)
- It takes place in **large scales** (larger than 1:50.000)
- It takes into consideration the **material** and **immaterial** spatial dimension .

The Regional planning is organized in 2 different levels :

- **Physical Planning**
- **Strategic Spatial Planning**

2.1 REGIONAL PLANNING Physical Planning

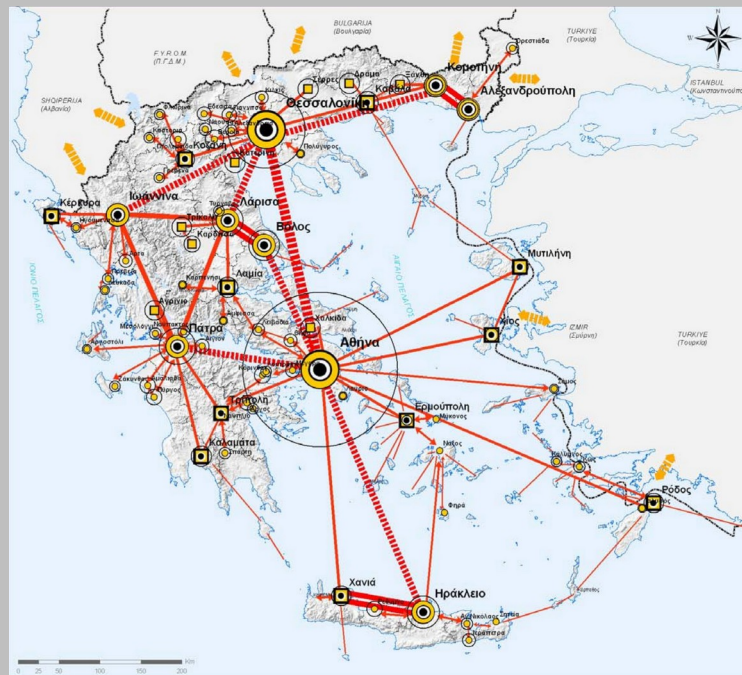

2.2 REGIONAL PLANNING

Physical Planning

Hybrid spaces

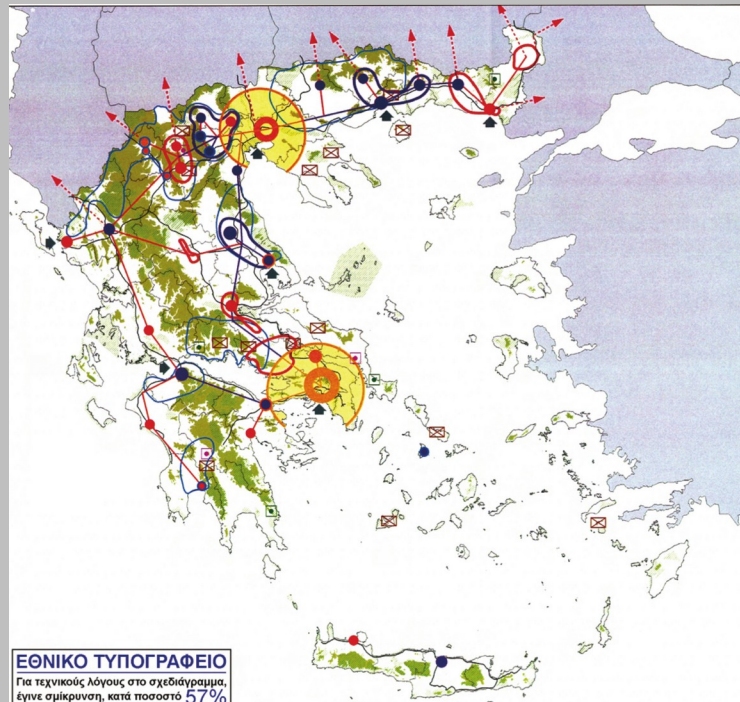

2.2 REGIONAL PLANNING Strategic Planning

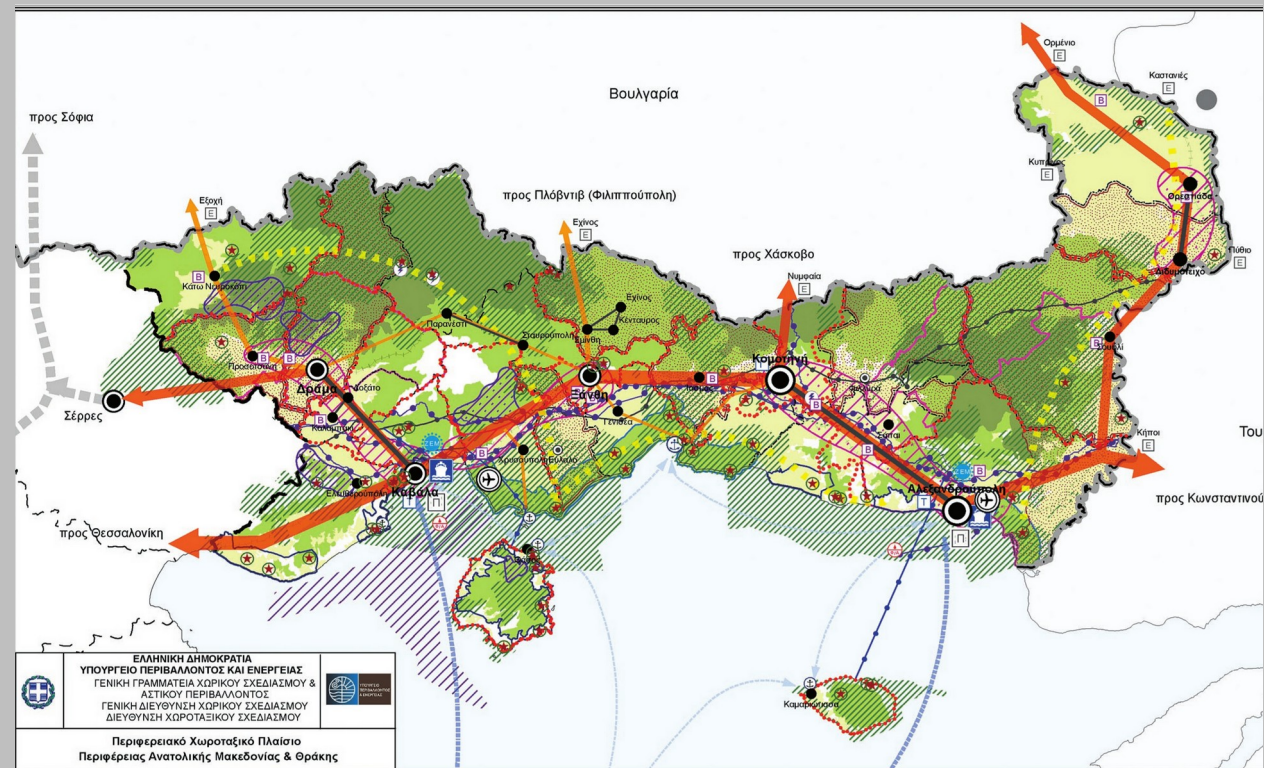

General Spatial Planning and Sustainable Development Framework (2008), Renamed it in National Spatial Strategy

2.2 REGIONAL PLANNING Strategic Planning

Special Spatial Frameworks for Industry (2009).

2.2 REGIONAL PLANNING Strategic Planning

Regional Spatial Frameworks
