- fastfoodmaps.com Find fast food restaurants, including
 McDonald's, Pizza Hut, KFC, Wendy's and more, anywhere in the U.S.
- <u>Cheap Hotels</u> A map of more than 66,000 cheap hotels in more than 165 countries that also lets you book online.
- <u>Dublin Public Transport Advisor</u> A trip planner for public transportation in and around Dublin.
- 99Trails.com Philadelphia Map A map showing walking and biking trails around the Philadelphia metro area.
- NYC Bike Maps A map of New York City's bike paths, lanes and greenways.
- BibleMap.org An interactive map of locations from the Bible.

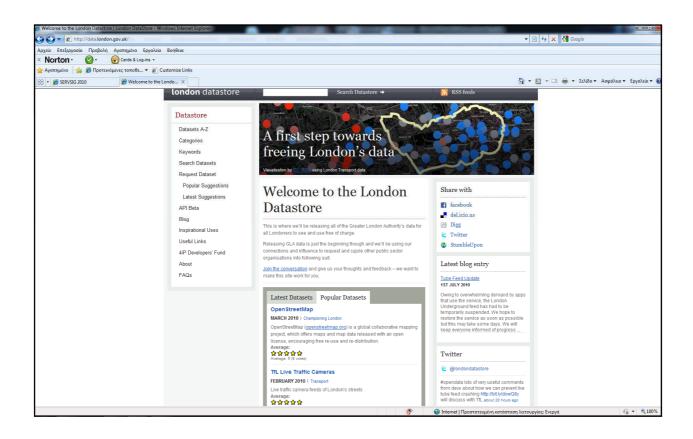

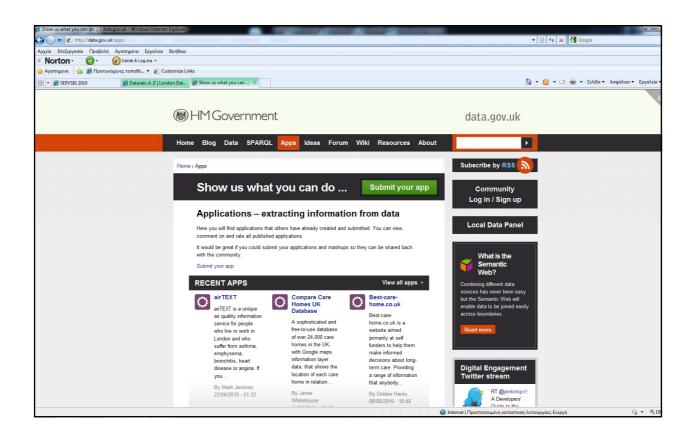

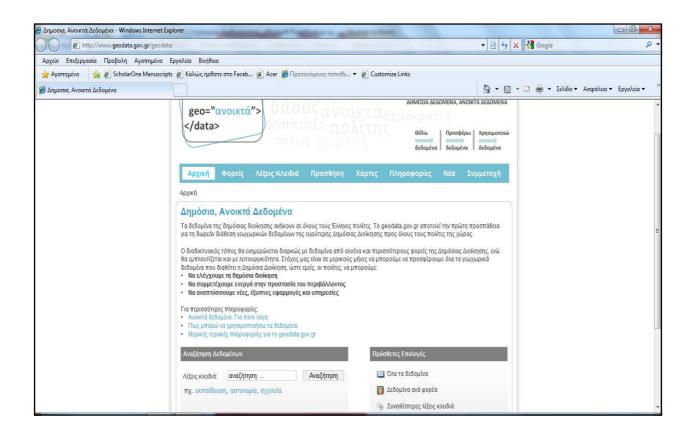

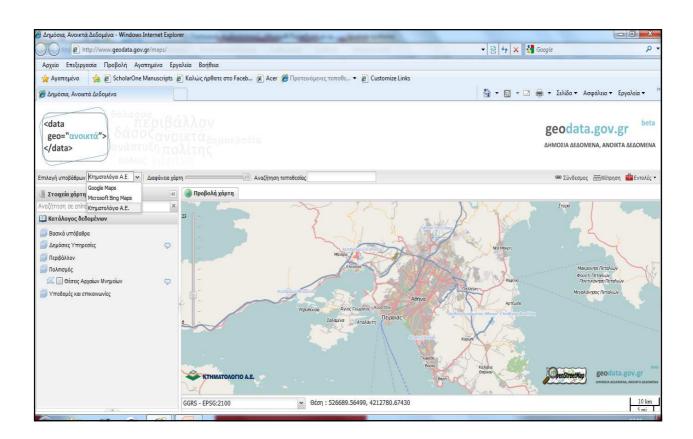

Three ways people interact with facebook pages

- Wall Posts: Anyone who "Likes" your Page can post content to your Page"s wall. Anyone! They can say good things, complain, talk about a recent experience they have—anything! These remarks are user-generated content about your brand.
- <u>Comments:</u> Comments are an opportunity to react to a wall post. Both you and your fans can comment. Consider it a mini conversation that spurred from the original post.
- Likes: The classic thumbs up! If someone "Likes" a wall post, this means they like the content of that post. This can also be translated to mean "I agree".

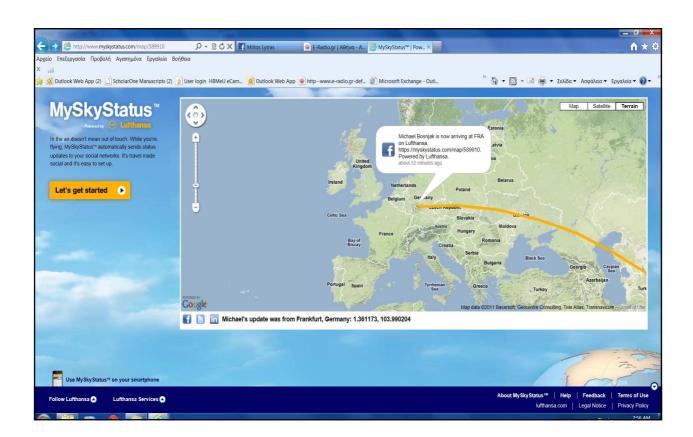

social graph

- This refers to Facebook's ability to collect, express, and leverage the interconnections between the site's users, or as some describe it, "the global mapping of everyone and how they're related."
- Think of all the stuff that's on Facebook as a node or endpoint that's connected to other stuff. You're connected to other users (your friends), photos about you are tagged, comments you've posted carry your name, you're a member of groups, you're connected to applications you've installed - Facebook links them all
